Sunburn:
Sundog Production's version of the popular burnout fashion trend.

Our unique process enables your artwork or logo to be etched into the fabric like traditional burnout. We start with a 50/50 cotton/poly blend shirt and apply the formula which causes the cotton to "burn out" and the polyester to remain intact creating a see through design. Some shirts are more subtle than others, and our creative staff can help you decide which shirt would be right for you. These can be done as allover prints, or in a specific location on the garment to meet your design and budget needs. Of course our stock patterns are shown here and can be enhanced with your team's name, other screen printed designs, or worn as they are!
